Angelo Trotta

Bio

Computer Science graduate passionate about harnessing technology to improve lives. Curious, motivated, and detail-oriented, I enjoy exploring new technologies and developing practical solutions that bridge the gap between people and technology.

Professional Experience

3D Artist

Freelance | Italy, Remote   10/2019 - 12/2022

Responsible for the creative design and development of 3D scenes and models, combining artistic vision with technical expertise to deliver high-quality visual assets.

- Led the creative design of 3D scenes and models.
- Collaborated closely with photographers and artists to achieve optimal visual results.
- Maintained continuous professional development in 3D modeling and software proficiency.
- Experienced in leading 3D modeling and animation software, including Blender and Unreal Engine.

Trainee Reviewer

Devils In The Detail | Italy, Remote   01/2021 - 01/2022

Developed semi-professional reviews aimed at informing potential buyers about the strengths, weaknesses and overall value of each videogame analyzed.

- Enhanced and deepened proficiency in the English language.
- Authored quality reviews with an emphasis on objective and critical evaluation.

- Official curator page:
  https://store.steampowered.com/curator/37072886-Devils-in-the-Detail/
- Personal curator page: https://store.steampowered.com/curator/40199055/

QA Tester

Groove Studio | Italy, Remote   07/2020 - 12/2020

Contributed to quality assurance of the first-person procedural indie horror game LOCIS, published on Steam.

- Conducted systematic game testing to identify bugs and gameplay issues.
- Analyzed and evaluated software quality to ensure a smooth player experience.
- Collaborated effectively in team-based problem-solving and group-thinking exercises.
- Researched and proposed solutions to technical and structural challenges encountered during testing.

Content Creator

Maker Studios | Italy, Remote   02/2015 - 02/2018

Formerly managed a gaming-focused YouTube channel with over 300 subscribers and several thousand views. Partnered with a third-party network providing revenue through advertisement integration.

- Led the creative design and production of informative and entertainment videos.
- Experienced in the use of major video editing software, including Camtasia Studio and DaVinci Resolve.
- Implemented workflow optimization strategies, resulting in cost savings, reduced resource waste, and improved production efficiency.
- Collaborated closely with fellow video creators to develop engaging and cohesive content.

EDUCATION

M.Sc. in Software Systems Security   2026 (expected)
University of Molise, Pesche, Italy

Exams taken so far:

- Advanced English
- Biometric Systems
- Computer Forensics and Investigations
- Security Governance
- Informatics and Law
- Computational Statistics and Machine Learning
- Software Project Management
- Software Security and Program Analysis

B.Sc. in Computer Science   24 October 2024
University of Molise, Pesche, Italy

Thesis title: *A Fine-Grained Analysis of Comments Quality in Code-Related Datasets*
Research area: Automated Software Delivery
Advisor: Prof. Simone Scalabrino
Grade: 108/110

Exams taken:

- Logic and Foundations of Computer Science
- Computer Architecture
- Programming I
- Operating Systems

- Probability Calculus
- English Language
- Programming II
- Mathematics I
- Introduction to Machine Learning
- Legal Informatics
- Algorithms and Data Structures
- Databases and Information Systems
- Physics
- Numerical Calculus
- Mathematics II
- Computer Networks
- Operations Research
- Automated Software Delivery
- Artificial Intelligence
- Hands on Unity
- Mobile Programming

High School Diploma   30 July 2021
Scientific Lyceum "Bonghi-Rosmini", Italy

Main subjects covered:

- Mathematics
- Physics
- Biology
- Chemistry

PROJECTS

UniMove - Car Sharing for University Students
University of Molise, Pesche, Italy   03/2025 - 09/2025

*In this project, I served as the **Lead Software Manager**. I delivered training sessions to students from the previous academic year who were responsible for developing the mobile application. The courses covered the fundamentals of CRUD operations, PostgreSQL, Java Spring for backend development, API testing with Postman, and the Ionic framework for frontend implementation. Additionally, in collaboration with the other managers, I coordinated task assignments following Agile methodologies, continuously monitored team progress, and provided structured feedback throughout all development phases to ensure an efficient and seamless workflow.*

GameTracker - Library Manager
University of Molise, Pesche, Italy   05/2024 - 07/2024

A mobile app (Android and iOS) built with Flutter to allow users to track video games across multiple platforms.

Project link: `https://github.com/ShyVortex/game-tracker`

- Enables users to log their gaming library (platform, playtime, completion date, highlights) and manage wishlists, favorites, and completed titles.
- Implemented user account creation and synchronization with a remote backend to preserve user data across devices.
- Integrated location-based features leveraging OpenStreetMap to record where a game was completed (physical location).
- Built settings menu including theme switching (light/dark mode) and profile customization.
- Coordinated the development of both frontend (Flutter UI) and backend APIs to deliver a seamless, responsive experience across platforms.

PlusOne - Simpler Healthcare Communication

University of Molise, Pesche, Italy 04/2024 - 06/2024

Developed a cross-platform mobile application using the Ionic framework to enhance communication among healthcare professionals in hospital and emergency settings. The app streamlines interactions between doctors, patients, and nurses, facilitating efficient information exchange and improving patient care coordination.

Project link: `https://github.com/ShyVortex/plusone-ionic`

Diffusion Tool - AI Image Generator and Upscaler

University of Molise, Pesche, Italy 12/2023 - 04/2024

JavaFX desktop application integrating a Python backend that leverages Stable Diffusion pipelines, BSRGAN models, and custom upscaling algorithms. Designed for offline usage, the tool offers image generation, high-quality upscaling, and degradation modeling, all while maintaining user data locally.

Project link: `https://github.com/ShyVortex/diffusion-tool`

- Architected the GUI frontend with JavaFX and managed Python integration for AI workflows.
- Implemented user authentication flows (Login / Sign Up) and structured navigation to Home, Profile, Generate, and Upscale modules.
- Engineered the core Generate and Upscale views as frontends to Python scripts executing Stable Diffusion and BSRGAN models.
- Defined system requirements and dependency management (OpenJDK 17+, Maven, Python + virtual environment.)
- Packaged the project as a runnable .jar with automated build steps (Maven) for easy distribution.

Simplified Monopoly

University of Molise, Pesche, Italy 08/2022 - 10/2023

Java application converting a command-line version of Monopoly into a graphical interface using Swing / GUI Designer, without altering the core game logic.

Project link: `https://github.com/ShyVortex/simplified-monopoly`

- Designed and implemented the user interface using GUI Designer and JFormDesigner, including layout, controls, and game state views.
- Managed project build and distribution using Maven and JDK 17.
- Learned OOP principles intensively, refined code structure, and improved design patterns for future maintainability.

CERTIFICATIONS

First Certificate in English (CEFR Level B2)   10 May 2025
Cambridge English

Grade: B
Overall Score: 179
Centre Reference: IT955 0125
Verification Number: D1233928
Accreditation Number: 500/2705/0

Getting Started with Rust (LFEL1002)   14 December 2024
The Linux Foundation

Certificate ID Number: LF-4evagqbkz5
Issue Link: Credly

EIPASS 7 Modules Users

27 February 2020

Certipass
